

# Full Moon Messages using The ORIGINS Process

*Selected on March 1, 2010*

*These insights are offered in the Light of Love to help us reconnect to and balance these energies within ourselves. They are 'stepping stones' and thoughts to consider as we continue our journey toward manifesting that which we have seeded during the New Moon. Now is the time to joyfully acknowledge the growth and share that joy with others. The moon cycle of seeding, nurturing, harvest, sharing and receiving is celebrated in this process. Enjoy the journey!*

Note: As you read the messages, simply focus on the word and phrase and then listen to your own inner voice. How do you feel? Is it affirming to what you're doing now? Is it something that you should consider doing? These are the types of questions that help you move inward toward your truth...one step at a time. Don't worry about the elemental notation of air, fire, water or earth, the number or the flower reference right now. Simply focus on the single word and phrase.

*Full Message from the ORIGINS Guidebook:*

The perception of the coyote is much like a child's, innocent yet directed toward what it desires most, and will try every trick to get what it wants. Sometimes it is your ploy to use this same technique to acquire what you feel is necessary. You employ humor and distraction to achieve your goals. While doing this however, you yourself may look foolish and childish and can bring about the perception that you are insincere and not to be trusted. But for you, sometimes it's simply fun and time for you to engage your nimble mind and curiosity toward all things. You have an innate ability to use this power effectively and are often considered to be extremely creative. Make certain that you temper this playfulness with sincerity and examine the truth within your heart. Be aware of the difference between being loved and loving what you desire. The consequences of your frivolous actions could have consequences. Don't be afraid to express what your heart truly needs to unite itself with what you truly love.
